1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 12 is rejected under 35 U.S.C. 102(a) as being anticipated by  
Takeda et. al. (1999').

Takeda et. al. disclose a process for making a spherical sensor  
(i.e.-an accelerometer) which is comprised of a silicon core sphere, which is surrounded by a shell with electrodes on the inner surface of the shell. This is discussed on pages 1-6. This is shown specifically in figure 11; and shown in general in figures 1-14.

3. The examiner requests applicant to establish a more precise date than the year 1999 for the Takeda et. al. reference, which they submitted. The examiner needs to know if the publication date of this reference is before or after applicant's claimed foreign priority date. In the event that the publication date for this reference fall between the US filing date for this application, and the claimed foreign priority date for this application, applicant would need to perfect their claim for foreign priority in order to overcome this reference. (Applicant may perfect their claim to foreign priority by submitting a certified English language translation of their foreign priority document.)

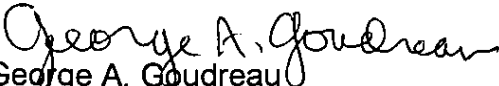

4. Claims 1-11 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
